Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a first action on the merits of application serial no. 10/673,353 filed September 30, 2003.

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim1 is rejected under 35 U.S.C. 102(e) as being anticipated by Korenjak et al. (6,390,869). Korenjak et al. disclose a personal watercraft comprising:

Art Unit: 3747

a hull; a seating assembly; a four stroke internal combustion engine secured to the hull below the seating assembly, wherein the engine comprises a crankcase having a crank shaft (123) rotatably mounted therein, wherein the crankcase (10) has a top, a bottom, two sides, and two ends, a cylinder head (20) connected to the top of the crankcase, wherein the crankcase and the cylinder head form at least one combustion cylinder chamber, at least one intake valve (21) for each of the combustion cylinder chambers, at least one exhaust valve (22) for each of the combustion cylinder chambers, a valve actuation assembly located in the cylinder head for operating the at least one intake valve and the at least one exhaust valve, at least one air intake passageway operatively coupled to the combustion cylinder chambers through the intake valves, an air intake manifold connected to the cylinder head and operatively connected to the at least one air intake passageway, and a supercharger (90) for boosting air to the air intake manifold; and a propulsion unit operatively coupled to the crankshaft, wherein the propulsion unit is located on one end of the two ends of the crankcase.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.
